INTRODUCTION

1.1 Statement of Objectives

The Policy aims to ensure that the Association effectively administers compliance with its landlord obligations in respect of gas servicing and thereby seeks to provide assurance to tenants in terms of gas safety.

Our objectives include:

- providing a prompt, efficient and cost-effective gas servicing service;
- maintaining our stock in accordance with the relevant and applicable legal requirements placed on us and our responsibilities set out in our tenancy agreement;
- ensuring that systems are in place to enable the Association to comply with its duties in relation to gas servicing;
- procuring appropriately qualified contractors to service gas appliances within the homes of tenants in line with legislative requirements;
- ensuring that essential remedial works are instructed so that the homes of tenants are safe to occupy in terms of legislative requirements;
- operating an effective gas servicing monitoring system, including audit trails and reporting systems that ensure compliance with the gas servicing process;
- collecting and using business intelligence on the condition of our stock and demonstrate that we are using this to make informed financial decisions to maintain and improve our stock; and
- taking positive steps to inform and listen to tenants about continuous improvements to our gas maintenance service.

1.2 Compliance with Regulatory Standards

In terms of the Scottish Social Housing Charter, the Scottish Housing Regulator has identified a number of key indicators relevant to housing maintenance by which it will measure landlord performance, including the following:

- Quality of housing – tenants' homes, as a minimum, when they are allocated are always clean, tidy and in a good state of repair, meet the Scottish Housing Quality Standard (SHQS), and any other building quality standard in place throughout the tenancy; and also meet the relevant Energy Efficiency and Zero Emission Heat Standard.
- Repairs, maintenance and improvements – tenants' homes are well maintained, with repairs and improvements carried out when required, and tenants are given reasonable choices about when work is done.
- Value for money – tenants, owners and other customers receive services that provide continually improving value for the rent and other charges they pay.

1.3 Expected Outcomes

Key outcomes of operating an effective Gas Servicing Policy include:

- ensuring that properties are well maintained, safe, secure and in line with the SHQS and EESSH where appropriate;
- optimising customer satisfaction with the gas maintenance service; and
- delivering value for money.
